

Day by Day Plan of Attack Chem 20 Acid Base Project

You should be able to finish this project within class / flex periods as long as you work diligently!

Day 1:

- Choose your chemical by researching relevant acids or bases that are used in industry
- Make sure that your chemical has both positive and negative effects on industry, environment, people, animals or plants.
- Begin researching: you should be able to finish:
 - Chemical Choice
 - Description
 - Chemical Reactions (at least part of it)
 - Make sure to make a note of your sources used

Day 2:

- Finish chemical reactions (if you did not before)
- Figure out the concentration description section
 - Make sure to make note of sources

Day 3:

- Find and explain pros and cons
- Find and explain fun facts
- Finish source list

Day 4-5:

- Start putting the work together on a website
 - Google sites, weebly, wix, etc all have good free formats

Day 6:

- Check over your work, make sure it all flows and is polished
